## STATEMENT REGARDING FORWARD-LOOKING INFORMATION

Statements in this document that are not historical, including, without limitation, statements regarding our plans, expectations, assumptions, and estimations for fiscal 2002, gross profit margin, and earnings, as well as anticipated sales trends and future development of our business strategy, are considered forward-looking and speak only as of today's date. As such, these statements are subject to a number of risks and uncertainties. Future results may be materially different from those expressed or implied by these statements due to a number of factors. Currently, we believe that the principal factors that create uncertainty about our future results are the following: customer response to our merchandise offerings, circulation changes and other initiatives; the mix of our sales between full price and liquidation merchandise; overall consumer confidence and general economic conditions, both domestic and foreign; effects of shifting patterns of ecommerce versus catalog purchases; costs associated with printing and mailing catalogs and fulfilling orders; dependence on consumer seasonal buying patterns; fluctuations in foreign currency exchange rates; and changes that may have different effects on the various sectors in which we operate (e.g., rather than individual consumers, the Corporate Sales Division, included in the specialty segment, sells to numerous corporations, and certain of these sales are for their corporate promotional activities). Our future results could, of course, be affected by other factors as well. More information about these risks and uncertainties may be found in the company's $10-\mathrm{K}$ filings with the S.E.C.

The company does not undertake to publicly update or revise its forwardlooking statements even if experience or future changes make it clear that any projected results expressed or implied therein will not be realized.

WEBCAST ANNOUNCEMENT
